TOPIC- HOPE: HOSPITAL MANAGEMENT SYSTEM

HRITUJA SEN-17BCE0354

MIHIR KUMAR SINGH-17BCE0851
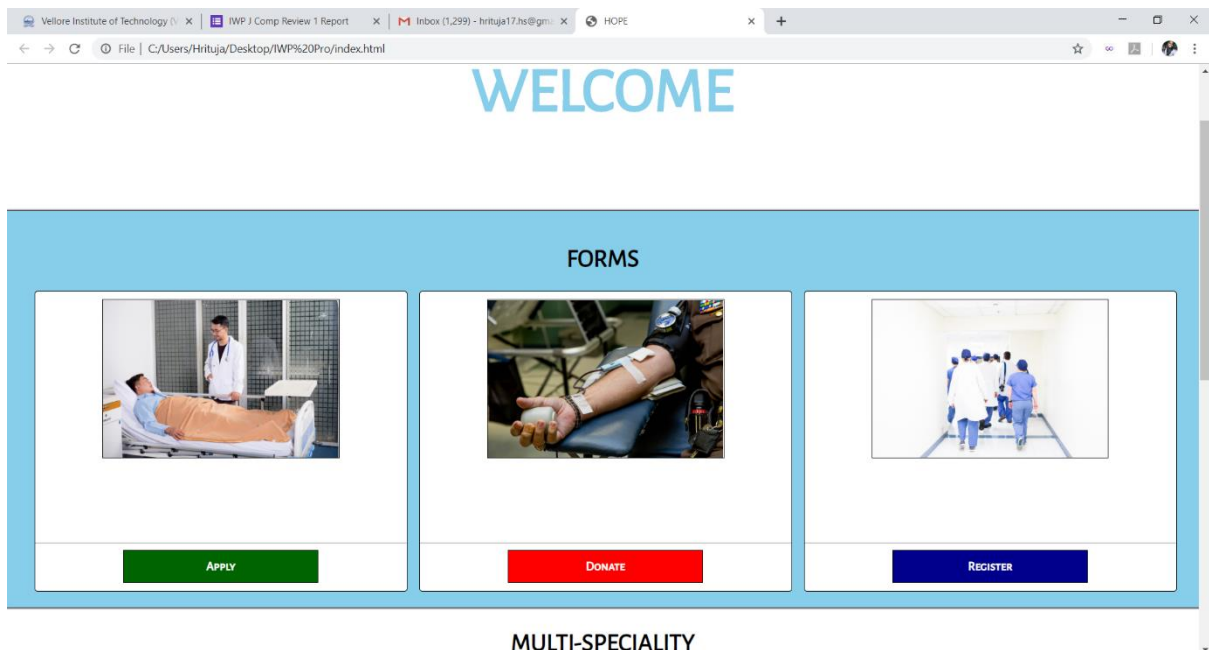

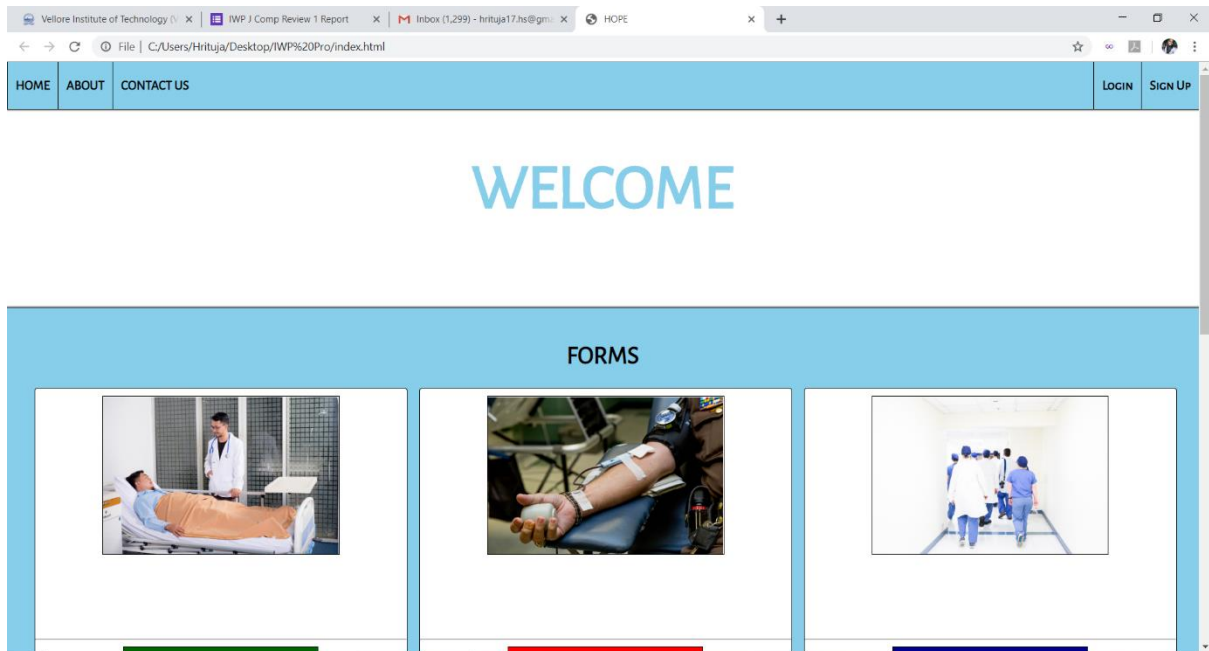

AVINA-17BCE0898

ABSTRACT:

HOPE; our name says it all. With our project, we aim to simplify the user experience while booking appointments with doctors, or to donate blood or organs. This project works on a hospital management system, to sign up new patients and provide them the facilities for treatment or for donations. Doctors can register on our website through a form, which would then give them a unique doctor number in our hospital.
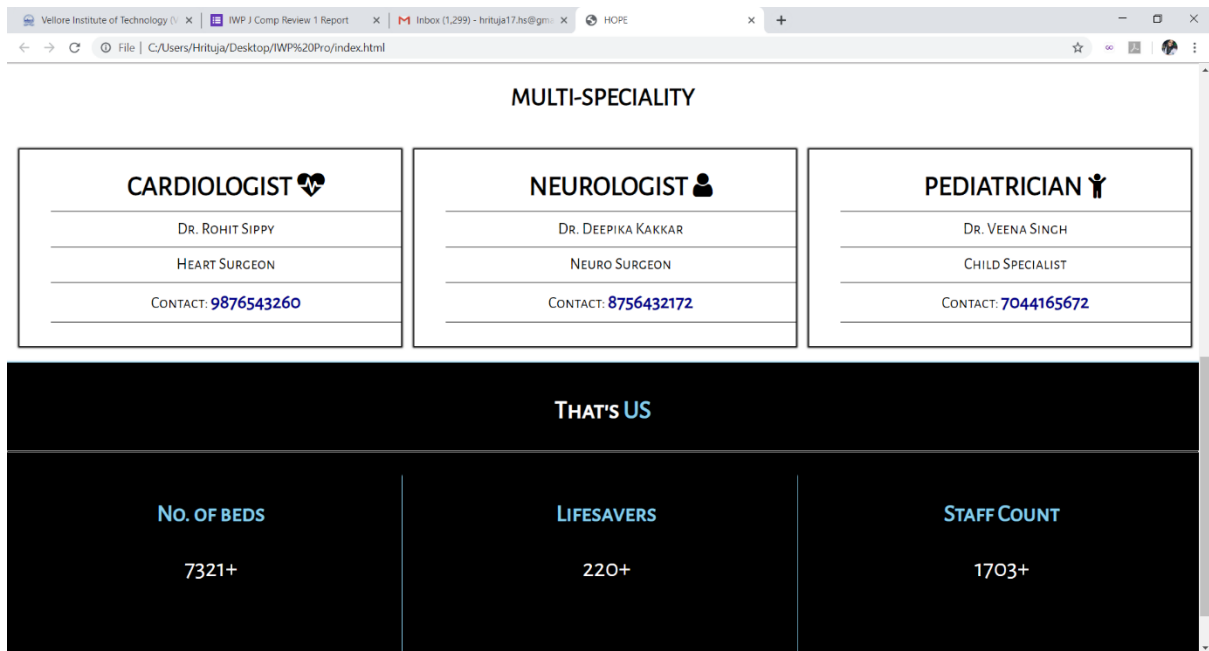

As we progress with the project, we aim to add more features to the website, like doctor details.

We'll be using HTML, CSS and JavaScript for the Front-End and MongoDB, Express and Node.js for the Back-End of the website.
